Number 42

A Bright and Prosperous New Year to All

Province of Alberta News Bulletin

Issued by the Publicity Campaign, Government of Alberta, Edmonton, December 22, 1934

REDUCTION IN MOTOR LICENSES.

Reduction of approximately \$5 in the license fee for the lower-priced passenger autos up to 115 inches, to take effect at the first of the year, when all motor licenses are due, is announced by Premier Reid, following a survey of the motor license situation by the cabinet. There will be no change in the license year.

Subsequently it is the intention of the government, states Mr. Reid, to raise the tax on gasoline by one cent, bringing the tax to seven cents per gallon. This will be a feature of the budget to be presented at the forthcoming session of the legislature.

The usual reductions granted in license fees at April 1, July 1, and November 1, will be carried through, applying to the reduced fees as announced, as well as to other fees.

The reduction in fee will make the license on all cars not exceeding 100-inch wheel base \$10 instead of the present \$15, on cars not over 105-inch wheel base \$12.50 instead of \$17.50, on cars not over 110 inches \$15 instead of \$20, and on cars not over 115 inches \$20 instead of \$22.50. Cars over the 115-inches wheel base will be licensed at the same rate as at present.

There will be a reduction of \$1 also in the license fees for all motor vehicles manufactured eight years previous to January 1 of the current license year; the fee for such cars with 100-inch wheel base being \$8 instead of \$9, and so on up to cars not exceeding 120 inches in wheel base.

The proposed increase in gasoline tax, stated Mr. Reid, will put the province on the same basis as British Columbia and Manitoba, whose tax has been seven cents for some years. The three Maritime provinces have a tax of eight cents, while Ontario and Quebec are six cents.

With respect to car licenses Mr. Reid pointed out, Alberta will now be lower than either Saskatchewan or B.C., the latter having a fee of \$20 for the 100-inch car, with an initial fee of \$10 for all car owners in addition, while Saskatchewan's fee for the 100-inch cars is \$12.50.

In stating that there will be no change in the license year, Mr. Reid announced that all licenses will be due and payable at the first of the year, but that 15 days' grace will be allowed before those driving with out licenses will be subject to prosecution.

Alberta oil fields for November were 98,038 barrels, bringing the total production for the year up to the end of November to 1,160,135 barrels compared with 909,696 barrels for the 11 month period of last year.

HONEY PRODUCTION

Upwards of 1,000 bee-keepers are now operating in the province, according to S.O. Hillier, provincial apiarist. While it is a considerable increase over the previous years, it includes a large number of those operating a small number of colonies. The total production estimated for the past season is 1,284,000 lbs., a slight increase over last year's 1,266,000 lbs., which is smaller

than that of last year. The bulk of the honey production is in the irrigated districts surrounding Lethbridge and Taber and at Brooks. These districts, among them produce over 900,000 lbs. of honey. The territory surrounding Edmonton produced close to 100,000 lbs.

LOW DIPHTHERIA DEATH RATE

Adoption of diphtheria toxoid as a generally used anti-diphtheria inoculation in Alberta has, during the past 10 years, resulted in a greatly reduced mortality death rate among the people of this province. It was revealed by Dr. M. R. Bow, deputy minister of health, from 1924 to 1933, 106 deaths were reported in 74 cases of diphtheria for a mortality rate of 17 per 100,000 population, the use of this toxoid brought the mortality rate down to less than one per 100,000 population. The 1933 figures, as stated by Dr. Bow, revealed 32 cases, and six deaths for a mortality rate of 0.75, the lowest in the province's history.

OFFICIAL SUMMARY OF ALBERTA'S WINNINGS

Official returns received from the Toronto and Chicago exhibitions reveal the full extent of Alberta's winnings this year at these two international shows. The record is well up to those of the past ten years. At Toronto royal fair, exhibitors from the province took a total of 214 prizes, including two grand championships, nine other championships, 42 first prizes, 43 seconds and 87 thirds. Beef cattle classes led with 66 prizes in all for Alberta, with two grand championships and six first prizes. Dairy cattle classes yielded a total of 43 prizes for Alberta, with four firsts and one special. Poultry and turkey brought a total of 35 prizes, and games 41 prizes, sheep 17 prizes and horses 13 prizes with one grand championship.

At Chicago international fair, Alberta exhibitors took a total of 58 prizes, including three grand championships, two first prizes, Alberta literally swept the boards in spring wheat, when eight of the first ten prizes were taken, including the world title, with 17 prizes in all. In live stock 9 prizes were taken at Chicago including two firsts.

year. The total value of 10 cents is \$128,400. Last year's average price was 9 cents. The average per colony for the province, according to returns, trade

Arrange a Theatre Party to attend the Preview Capital Monday night at 11:15 p.m.

Parent Teachers Meeting Jan. 3rd.

The regular meeting of the Parent Teachers Association will be held in the High School Auditorium, Thursday, Jan. 3rd, at 4:30 p.m. The following program will be given, and all parents in the town and district are invited to attend.

John H. Blackmore, B.A., will speak on "Training the Pre-School Child." Current events will be given by R. G. Kirkham. Reading by Miss Florence Hinchaka. Musical game by students of Miss Nalder's room and a song by Miss Myra Dahl.

Late News From The Oil Well

Cardston's first oil or gas well is making good progress and the Franco Oils Ltd. is looking toward 1935 with confidence toward Moose Jaw where Mr. Thota, the greatest mover in organizing this company, lives. This letter contains information which is valuable to the general public, and no person interested in Cardston and District can help but become enthusiastic over the showing already made by this company as revealed by this letter now in circulation. The information contained indicates:

1. That the well is now more than 1500 feet deep, and progress today is more rapid than ever before due largely to the heavy flows of water previously well, and that every effort is being made to reach their goal as quickly as possible.

That several showings of petroleum gas have been encountered promising good flows of gas at shallow depths, which element which has been needed in all harmony ever since the building has been with Dr. Hintze's original geoscientific of this structure, and that having accidents, good news ought to be available at an early date.

3. Original stockholders from all over Southern Alberta and Saskatchewan, centering around Moose Jaw where Mr. Thota, the greatest mover in organizing this company, lives. They have visited the well and are satisfied, and are still taking more shares which is still selling at 50 cents, and advise all others to take this opportunity while they can still purchase at 50c, as undoubtedly if gas or oil is struck the price will rise immediately.

That the management and drilling has been done with a minimum of expense, and that all money taken in for shares has been put right into the well, and that every effort is being made to reach their goal as quickly as possible.

Equipment has been purchased, and will be installed shortly providing a hot shower at the Opera House. This is an improvement which has been needed ever since the building has been with Dr. Hintze's original geoscientific of this structure, and that having accidents, good news ought to be available at an early date.

News :: Notes

FREE RADIO Capital Monday night at 9:15. Plan to come and stay for the Preview at 11:15.

There is not much left of 1934. If you are going to do any more good deeds this year you had better get busy.

Miss Hilson Hill, Gordon Fulton and Sonny Ruten were Raymond visitors with Mr. and Mrs. Frank Ruten on Sunday last.

A Sunday School program in each ward Sunday was greatly enjoyed, and parties were held during the week for the kiddies of both the wards.

With the sharp north wind blowing there were not many who ventured out for entertainment at night, and consequently holiday shows and dances were not very well patronized.

Local merchants report a very good business for Christmas, and in most cases far ahead of last year. The drop in the mercury on Saturday and Monday also made business more brisk.

The Capitol announces that New Years day at 1 p.m. they are having their annual FREE Matinee for Kiddies under 14 years of age. Plan to send your youngsters.

Raymond High trimmed Stirling in last night's tournament at Magrath, and are paired with the Garden City quint for tonight. The tournament is causing considerable interest in sport circles.

Leonard Watson left Friday morning for Provo, Utah, where he will enter the B. Y. U. for the coming term. He intended going with the other boys from here early in the fall, but his work kept him here until now.

Arrange Now to attend the Capital Monday, FREE RADIO at 9:15 and a special Preview at 11:15 p.m.

The bowling alley started over the week-end, and the crack of balls against the pins is heard now as one passes.

Fur caps, high overshoes and fur coats were all the style over Christmas, and even then frost bitten chins, cheeks and noses were quite common.

Plan to attend the Preview Monday night at 11:15 p.m. One of the finest pictures of 1934, Loretta Young in "The White Parade."

Mayor Meeks returned home this week from a moose hunting trip, and brought his moose with him. He treated a number of his friends to cuts of the prize and moose roasts will be the style for a few days.

D. L. Galbraith and Joseph Nilsson were the speakers in the Raymond First Ward Sunday evening last. Musical numbers added to the interest of the program.

The Xmas Dance of the High School last Friday night was fairly well attended, and everyone reports a very enjoyable time. This marked about the beginning of the Christmas dances.

Mrs. David Bullock of Wellington was the lucky winner at the Capital Thursday night, when she won the \$50.00 given away there. The feature picture "Two Got Your Number" was greatly enjoyed.

Now that the holidays are over perhaps we can get busy and think about our civic elections. They are not far off and there are quite a number of vacancies to be filled.

Sunburst Basketball Team Here Saturday

OLD TIME WINTER WEATHER

Commencing with the fall of snow on Friday night and Saturday, the mercury did a nose dive during Saturday night, and since then we have had a sample of old-fashioned Alberta winter dished up to us. There have been so many reports as to how cold it has been that to state anything here would only start an argument, but most everyone will agree that it has been cold enough, and with the keen north wind that blew for a couple of days the first of the week, it was hard to be out long and keep from frosting faces or hands.

No serious effects are looked for from stock men and feeders, as plans are always laid for severe weather, but stock sure had a bow in their backs for 3 or 4 days, regardless of how much shelter they had.

Thermometers were registering all the way from five to twenty-five below during about four days or more of this week, and there is no sign of a lift up as yet. Wednesday two bright sun spots were shining almost as bright as the sun, and this means more cold weather. Light powdery snow has fallen several times in light falls and a little drifting has taken place, but roads are still open and generally are good.

So much summery weather in November and December has rather spoiled all of us, and we think it should be that way all the time. But, we are still in Sunny Southern Alberta and once in a while it gets cold, just to remind us of what it used to be all the time.

Basketball Chatter

With the basketball season just about to open a little stuff on the Jacks and Idlers should be interesting. Read this and you will be better able to appreciate the games this season.

Jacks: The Jacks line-up is a complete Donny Nilsson, lanky football artist, came into the fold Monday night to make the Jacks intact for the coming year. The meter is the same as last year with one exception, Turner replaced Rolfson as guard.

For the first two weeks the Jacks were away off in their shooting but practice has peeled their shooting eyes until they are sharp on a par with last year. Hague and Turner are sending "Big Bertha's" in from past Centre; Kirkham seems faster, and his running mate O'Brien is craftier the ever, "Sam" Fairbanks, ball handler de luxe, is certain for a big year. "But" Halder is clicking continuously with Cliff West looks a good 15% better.

The Jacks are adopting the centre pivot play, so common among our neighbors to the north. At the start of the year they looked pretty weak but with Donny playing as pivot man it appears that they are going to be unstoppable.

Idlers: Getting into practice a month before other years the Idlers are seriously mindful of the crown they won last season. Coach John O'Brien thinks in Card, Harkey and Meeks he has been compensated for the loss of Galbraith and Van Orman.

The first basketball games of the season will be played Saturday night, December 29th in the Opera House, when the main game will be between Sunburst and the Union Jacks. A good fast preliminary with the Idlers has also been lined up.

The Sunburst team have a good record of games, with a high percentage of wins against some of the best teams in northern Montana, and should give a good account of themselves. Their lineup is as follows:

Butcher, centre; Pippen, right forward and Conklin, left forward; Lakin, right and Ashworth, left guard. Some of these players have been in the best amateur teams of the western States, and are showing fine form this winter.

The Jacks need no introduction to local basketball fans, and those who attend Saturday's game are assured a good contest, and a good report from the Jacks, no matter how stiff the going is.

Come on out and give the boys a good start to the winter season.

Canadians Win Inter Club Title At B.Y.U. Provo

Southern Alberta's fighting Canadians snared the inter-club basketball championship by driving through the giant Millard club team, finalists in the contest, to the score of 26-21 in a 32 minute game.

Not listed as favorites at the beginning of the tourney, the snail Canadians nevertheless were undefeated in meeting teams from Arizona, Wyoming, Idaho and Utah county students. Last year the Canadian students at Brigham Young University, where the contests are conducted, went through to take second place honors.

With Dean Rolfson, former Union Jacks player, in their line up for the first time, the Canadians were inspired to some pretty team work, although they were disappointed in their shooting accuracy.

Every member of the lineup teamed effectively against the Millard boys, who averaged about six feet two in height. The following list includes the men and points made: B. King, Raymond, 10; H. Walker, Raymond, 7; H. Forsyth, Cardston, 5; S. Grow, Cardston, 4; W. Pithers, Cardston, 4; D. Rolfson, Raymond, 3; and F. Walker, Raymond, 4.

Bruce is attending U. of Utah this year and "Wickie" has taken the mentorship of the first Ward "M" Men.

The Southern Alberta Intermediate circuit is composed of the following clubs: Idlers, Lethbridge, Cardston, Barnwell, Stirling and Magrath. Competition is to be keen but the Idlers hope to win the second year in succession.

Under the coaching management of Lloyd McPhee the Idlers have made order a complete new outfit. The Raymond Mere are procuring the jerseys and trunks and the Broadway the sweaters and cut-offs. These are to be donated by the generous business houses of Raymond.

Be on hand this year to see the boys in action and let's try and win both title this year.

GREET THE NEW YEAR

1931 is about done. All in all it has been a good year, and we all have a great deal to be thankful for that we have lived in it and experienced the problems of life it has presented to us.

During the past four years we have been imbibing the lesson of doing without a great many of the things we used to we had to have. Ask yourself the question whether or not you are really any worse for all these experiences. True we have worn our clothes longer, our hair longer, and our shoes thinner, but in these things many of us have learned this lesson.

"It is not just as we take, this has been world of ours."

But it will yield as we make it. A harvest of weeds or of flowers.

These are not the words of the poet but they mean the same anyway, mainly that wealth, station in life and easy money, are after all no proper for success and real happiness. The things that count are our friends, our families, and the opportunity for service that life offers us. When these things are lacking, then in truth has happiness forsaken us.

It would be a nice thing if

this holiday season for all of us to take stock of the past year, and see whether we have progressed or gone backwards. Wise men say there is no such thing as standing still, we either go ahead or we go back. How are you, first mentally, have you added to your store of knowledge through good and wholesome reading, and study that requires thought and reflection. We acquire most of our learning after we leave school so this question applies to all of us. We should always be studying, and keep our mind and memory bright. It is painful and disappointing to meet people back to the things they talked of back to the things they talked of ten or twelve years ago in order to find something to say. When get to the point where a good piece of literature puts us off to sleep at any time of the day, then we are doing ourselves in hand at once.

Next, spiritually. Regardless of whether a person lays claim to any church or not, he or she should show some advancement in spirituality. Our appreciation in this respect should be growing. We are getting, every day, a little nearer the place where all things are spiritual, and only spiritual values will count. Even the unfortunate ones, whom by a few are called "ragged and ragged," are facing this future, and should think of it once in a while.

Temporally, what? We believe that speaking of the community as a whole we are better off temporally this New Year than we have been at any time since 1930. As to whether we are any better off for this prosperity we would not attempt to

GRADE A MEDIUM EGGS

Canadian housewives, particularly in the larger centres, are passing up a good bargain in not buying more Grade A Medium eggs, stated W. A. Brown, Chief of the Poultry Services of the Dominion Department of Agriculture, is commenting on the present egg market situation from the consumers viewpoint.

Reports coming to Mr. Brown from the various egg inspection offices under his jurisdiction state that the public is buying Grade A Large and Grade A Pullet eggs freely, but for some reason are neglecting the Grade A Medium.

Mr. Brown points out that all Grade A eggs are fresh and of good quality, the only difference between Large, Medium and Pullet being in size. The minimum weights per dozen are 24, 22 and 18 ounces respectively. The retail price on Grade A Large in Montreal today is 45 to 49 cents. On that basis Grade A Medium egg are worth at least 41 cents, but they are actually selling at 33 to 36 cents.

Happy New Year Folks

We are convinced, however, that it is true. We should be better neighbors, better as church members, and better as Christians. If we are not, then we are unworthy of the prosperity with which we have been blessed.

At the beginning of 1935 let us check up and see where we stand in respect to these things, and above all "Count Our Many Blessings."

WEEKLY LETTER

In our last New Year's letter the opinion was ventured that 1934 would be somewhat brighter for the people on the land than the drought-depression years that preceded. This hope and prophesy was realized in some measure at least throughout a large part of Southern Alberta even though times on the farm are still very difficult and there are undoubtedly many individual instances where circumstances have not improved. The burden of debt weighs heavily in many cases and in the absence of low cost credit or any credit at all the replacement of worn out equipment and machinery on many farms presents a perplexing problem. In spite of all this however, there has been a definite upward trend in most cases of farming in southern Alberta during the past year and today there is among farmers generally a good deal more optimism than has prevailed for a number of years past.

There is substantial reason for this greater degree of confidence as far as southern Alberta is concerned in that a relatively good crop was harvested during the past year. The spring was very dry but timely rains in June provided excellent growing conditions and in spite of dry hot weather in July wheat yields in some districts averaged as high as 22 bushels or more per acre while throughout southern Alberta averaged between 16 and 17 bushels per acre, or 7 bushels more than in 1933. At the same time the wheat growers received approximately 16 cents more per bushel than they did in 1933.

The result of this two-fold advantage is that the wheat growers of southern Alberta will receive somewhere around \$19,500,000 for their 1934 crop as compared with only \$8,000,000 received in 1933. This is equal to a gain of almost 150 per cent. The effect of this increased revenue is being reflected in many ways and is no doubt the cause of the greater degree of confidence that prevails.

Conditions are not so encouraging in the northeastern area of southern Alberta touching off the region of the prairie drought has been so severe. Here crops were almost completely destroyed by drought and much grass and the farmers

still remaining in this area are facing the task of carrying on under very difficult circumstances. The best with difficulty and is one that each farmer must work out for himself, but it is indeed a question whether the complete depopulation of extensive areas of this drier section is going to prove best for all concerned.

Large areas east of Lethbridge, it will be remembered, were some years ago and now it is of interest to note, much of this is resettled. In fact quite a noticeable increase in farm sales has been reported during the past year indicating a strengthening of land values, which underlie our whole agricultural structure.

Moisture is a primary controlling factor in crop production and there is nothing man can do to affect precipitation. Yet we have a background of experience now available that can and is being used to advantage in developing methods in wheat production. In addition to some mechanical power and equipment available resulting in a lessening of cost operation making it possible to grow and harvest short low yielding crops.

This letter, written on the eve of a new year, carries with it to all our readers the best wishes of the staff of the Experimental Station.

DID YOU EVER STOP TO THINK

By Edson R. Waite,
Shawnee, Oklahoma

GOVERNOR GEN. FRANK MURPHY, OF THE PHILIPPINE ISLANDS SAYS:

"A man's job and the faithful performance of it has a freshened significance today.

"A small taste of joblessness has been in part the explanation of this return to an old integrit.

"Disillusioned man is slowly recapturing the old virtues and love of duty is one of them.

"In any event it is a happy augury and will contribute no little to the general satisfaction

News Notes

Happy New Year folks, and may the year 1935 be the best year you ever had.

A nice warm spell of weather would certainly be welcomed by the school kiddies so they could enjoy their Christmas holiday a little more.

"Mrs. Wiggs of the Cabbage Patch," at the Capitol this week end, is a picture every member of the family will enjoy and appreciate. Be sure and see it.

A welcome moderation occurred in the weather during Thursday night and despite the fact that no Chinook is blowing it feels as if one was in the making.

"The FIRESIDE PHILOSOPHER"

By ALFRED BIGGS

Be sparing with your advice.

Better to be refined than beautiful.

Nothing is more certain than uncertainty.

The spirit travels where the mind cannot reach.

Greatness is thought or deed speaks for itself.

Some folks get sick worrying about their health.

You're no use to yourself if you're of no use to others.

ALL-BRAN RELIEVED HIS CONSTIPATION

Delicious Cereal Brought New Health to Mr. Bartholomew

We quote from his voluntary letter: "I had considerable trouble with my stomach. Digestion was out of the question. I got medicine which gave me only temporary relief.

"Then I thought of taking ALL-BRAN. I started eating a cereal dishful two or three times a day.

"It has been over a year now since I ate the first dish of bran, but from that day to this I have had the pleasure of enjoying the proper functioning of the digestive organs.

"Thanks to ALL-BRAN, I still eat it regularly and like it better all the time."—Lester Bartholomew (address furnished upon request).

Constipation is usually due to lack of "bulk" to exercise the intestines, and vitamin B to promote elimination. ALL-BRAN supplies both, as well as iron for the blood.

The "bulk" in ALL-BRAN is much like that of leafy vegetables. Certainly this food is more natural than taking harmful patent medicines. Two tablespoonfuls daily will usually overcome most types of constipation. With each meal in chronic cases. If not relieved this way, see your doctor.

Get the red-and-green package at your grocer's. Made by Kellogg in London, Ontario.

To Guard The Skin Against Harsh Winter

Nothing is so universally effective as Melba Vanishing Cream. It softens the skin, corrects irritations and chapping. Absolutely greaseless and the perfect finishing cream and powder base.

Canada Makes Progress Says Beatty

**C.P.R. President Reviews Past Year and Finds Evidence of
Permanent Economic Improvement in Advances so far
made—Predicts Canadian Wheat as Best in the
World will find Steady Market.**

THE course of our recovery from the economic catastrophe which swept over the world in 1929 and 1930 has been markedly different from that of any of the previous cases of business expansion in this country. This time we seem to be experiencing a process of slow rebuilding, and, as far as I can see, one of permanent re-adjustment of our economic activities to conditions which have radically and permanently changed. What we are today experiencing is a process of steady, and I hope permanent, growth.

E. W. BEATTY, K.C.
Chairman and President
Canadian Pacific Ry.

This to my mind would be an entirely normal result of the causes which led to the great collapse of Canadian business. The boom conditions which followed a temporary depression after the Armistice were, as far as Canada is concerned, chiefly the result of forces and conditions in other countries. Actually our productive boom resulted from tangible demand for Canadian products, and from conditions in other countries which directed a flow of capital into Canadian development. Equally the economic collapse in Canada resulted chiefly from forces operating in other countries.

Nothing is more important in our economic life than our great exporting industries. In the case of wheat I have never accepted the alarmist views which have been freely expressed. The world surplus stocks, produced partly by active encouragement of production in many importing countries, and partly by a series of unusually favourable seasons in Europe, seem to be needed to meet the marked shrinkage in production in 1934. While complete recovery of world commerce in wheat must depend on some limitation of excessive economic nationalism, on greater stability of monetary exchange, and on increase in the total volume of other forms of world commerce, I see no reason to believe that Canadian wheat, the best in the world, sold at fair prices, will not find a steady market.

Other primary products, such as minerals, lumber, and bacon are being exported in increased volume and at better prices, largely owing to the Imperial trade agreements of 1932, and the newsprint industry shows clear sign of recovery.

It is to be regretted that the past few years have seen further increase in the debt of the Dominion, the Provinces and many municipalities. Much of our public debt has been incurred for purposes obviously legitimate as part of the ordinary government of the country, but much has resulted from experiments in the

direction of governmental participation in business. Regrettable as is the loss occasioned by errors on the part of private enterprise, this type of loss is corrected by a reduction in the income and capital holdings of those who finance the enterprises. An unwise investment by a public body means a permanent charge on the tax-payers. I recommend this thought to those who believe that further expansion of governmental activities is the best method of protecting the ordinary citizen from exploitation by capitalists. In actual fact the safest policy for great capitalists is at present to buy securities issued by public bodies and to leave the chance of loss to be carried by the mass taxpayers.

Throughout the past year the matter of the country's railway problem has received an increasing amount of public attention, and I am convinced that proposals for its solution along the lines of unified management for the two great companies have made decided progress. In all directions are observable a greater willingness on the part of the public to enter upon an unprejudiced consideration of the case, and even among those classes whose interests might at first glance seem to be threatened by any such proposals, I discover a growing desire to examine their possibilities and to find out if they really are as dangerous as those who early rushed into print to attack them would seem to believe. This is all to the good. If unified management will not stand up under the most searching criticism, obviously, it should not go forward. But the criticism should be fair and honest and it should be based upon a fairly sound understanding of railway economics and not upon personal interest or prejudice. I say nothing less than the truth when I affirm that most of the criticism that has come out so far will not stand up before any one or even two or three of the above tests. I shall not further deal with the matter here, except to say that I can see no other way than unified railway management in which the country can put a stop to the continual cumulative wastage of vast sums of money and can safeguard the future of both railways while adequately preserving the property rights of the Canadian people in the Canadian National, and those of the shareholders of the Canadian Pacific. In a word this is my proposal for unified management—it is a partnership between public ownership and private ownership with the added advantage of private operation free from political control.

Both Canadian Railway systems as well as the railways of almost every modern nation, have suffered to some extent from the growth of highway transportation. The general use of privately owned motor cars, and an increasing amount of pleasure travel in prosperous times, have led to the construction of a great network of modern highways,

which in turn have been used as the right of way for a great number of freight vehicles. To a great extent the operations of these vehicles and their policy in setting their charges, have not been subjected to the same close supervision which public authorities have long given to railway operations and tariffs. In this case also public opinion is pressing for better handling of the situation. The railways do not question the advisability of building good roads, or of permitting them to be used for commercial transportation, but the perfection of the present attempts to proper control of this operation will, in my opinion, return to the railways at least some of the business taken from them by highway transport and place both highway and rail transportation on a sounder basis.

It is also interesting to note a growing public sentiment in the direction of demanding some contribution to the upkeep of our great and costly inland waterway system from those who use them—especially in the case of ships of foreign registry.

With every correction of these special cases of unfair competition, the Company must depend chiefly for a restoration of its normal business on a recovery of Canadian prosperity in general. The outlook in that respect is comforting. The very careful studies prepared by the Dominion Bureau of Statistics indicate a condition far from as alarming as some authorities would make it.

In this great and seemingly populated country we should not, however, be talking only of recovery. Canada should look forward to expansion in every direction. To my mind the policies needed to insure this are very simple. I should list them as: scrupulous care to prevent the debts of public bodies and resulting destructive taxation from any further increase; concentration of our efforts both in public policy and private business on the increase both in volume and prosperity of our primary industries—especially agriculture; public and private business policies looking to increase the population of Canada—especially in the agricultural areas; and, as I have repeatedly said, an immediate correction of the burdensome and costly duplication of transportation facilities.

It appears to me that we can look back on 1934 with some contentment, as a year during which we found that the world was not ending, and that by industry and thrift nations and individuals could still prosper. What interests me more is that I believe we can look forward to 1935 and successive years with confidence that under Providence we shall see in them a period when Canada will revive that faith in her future which too many of us seemed to lose, and that we shall again come to realize that all that is wanted to set this country on a forward path of progress are such simple virtues as energy, honesty, and ordinary common sense.

FROM FARM CLUB MEMBER
TO EXPERIENCED AGRIC-
ULTURE

An outstanding feature of the training received by Canadian young farmers and farm-ette, as members of the various Boys' and Girls' Clubs, is the pronounced effect on their success in after life. All over Canada there are many leading agriculturists who are proud to admit that the foundation of their present comprehensive knowledge of farming was laid while they were members of the boys' and girls' farm clubs of their district.

Several examples of this were to be found during the past week at the Royal Winter Fair in Toronto, among the well-known names of the older folk prominent in the executive, advisory, and judging lists, and the good work was also being carried on in a modest way by the younger generation, those who had just shed their boys' and girls' club feathers. For instance, there was Jack Rainbird of Stayne, Ont., who this year won the gold medal for highest standing in judging swine at the inter-county judging competition. Last year he was a member of the Stapper Swine Club team. Clifford Baldwin of Barrie, Ont., winner this year of the Strophouse Memorial Trophy and gold medal in the judging of Dairy Cattle is a former member of a Boys' Farm Club, at one time he was one of the most active members of the

WHEAT VS WHEAT FOR GROWING PIGS

(Experimental Farms Note)

Wheat has been compared with barley for hog feeding at the Experimental Station at Scot, Sask., with a view to ascertaining the relative value according to weight. The wheat used graded "feed" and the barley 3 and 4 C.W. All grain was chopped and comparisons were made pound for pound. In two tests each grain was fed alone and checked against a mixture of oat and barley chop and in two further tests each grain was combined with oats. In all cases where oats were mixed in the ration the proportion was to three of oats at the beginning of the feeding period and the other feed until at the end of the feeding period only one quarter oats was used to three quarters of the other feed. In the first instance, where the grain were fed alone, the average of the two tests showed going to be 3.6 per cent higher in the lot getting wheat and 5.5 per cent lower in the lot getting barley as compared with the gain resulting from the use of the oat and barley chop mixture mentioned. The chop required per hundred pounds gain was 4.9 per cent less in the case of wheat and only half of one per cent less in case of barley as compared with the mixture.

When the two grains in question were combined with oats, 1.5 per cent greater gains were produced by use of wheat as compared with the oat and barley mixture and the chop required per hundred pounds gain was 1.8 per cent less where wheat was used in the mixture with oats in the place of barley.

The gains produced in these trials indicate feed wheat to be more valuable than medium quality barley for feeding hogs.

Barrie Ayrshire Heifer Club, and as such in 1930, with two other boys represented Ontario in the International Dairy Judging Competition held in England. And so on it goes, in all the provinces the young farm club member later graduates into the highly efficient farmer of Canada.

Even tho you attend pictures but once in awhile see "Mrs Wiggs of the Cabbage Patch" Friday and Saturday.

Ray Knight was in Shelby on Wednesday and Thursday, taking his wife there, where she took the train to Salt Lake City for the remainder of the winter.

CHILBLAINS

When winter comes, chilblains begin to affect those who are not in good health, whose circulation is poor and whose clothing is possibly insufficient. By far the most common locations for chilblains is the feet, but neither the hands nor the ears escape.

At the point where the chilblain develops, there is, first of all, a tingling sensation, then itching. A blister, which has a purplish tinge, forms over the area. This blister is painful and when it breaks an open sore is left which is slow to heal.

To avoid chilblains, the feet must be protected and kept warm by shoes and stockings which are neither so tight as to interfere with circulation, nor so thin as to allow for chilling of the feet. Tightly-fitting shoes with thin soles, over thin stockings invite trouble, as do stockings which are so heavy as to cause the feet to perspire.

When the hands and feet are chilled, they should be kept away from open fireplace, stove or radiator. A sudden change from cold to excessive warmth causes a rush of blood to the parts which have been chilled, and this leads to irritation, followed by chilblains.

Under such circumstances, supposing it is the feet which are cold, the proper procedure is to remove shoes and stockings. First of all, the feet should be placed in cold water and then given a brisk rub with a rough towel. This treatment restores circulation gradually and averts trouble.

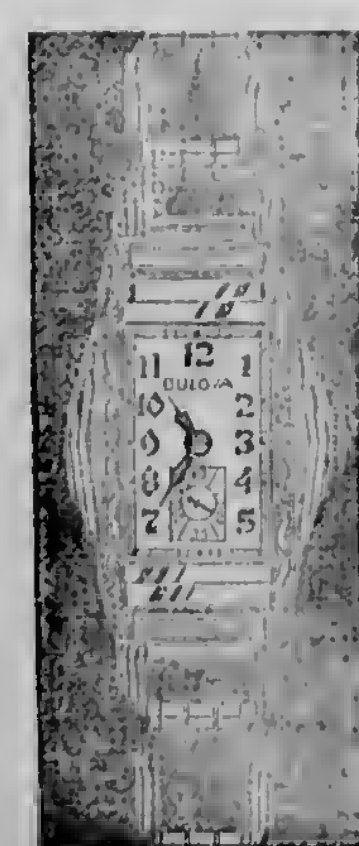

A poor state of health may be the underlying cause of chilblains, and so it follows that, as a practical measure of prevention, the general health should receive attention through proper diet and such hygienic essentials as fresh air, rest, exercise, cleanliness and elimination.

In many homes the floors are cold, and in such homes, the mother who stands for so many hours, doing her housework, develops chilblains on her heels and the sides of her feet. To some extent, this may be overcome by wearing heavier shoes and warmer stockings, but more attention should be given to warming the floors.

Painting the parts with tincture of iodine will stop the itching at the onset. If an open sore develops, it is well to remember the danger of infection that attends all open sores and secure skilled treatment.

Chilblains are not dangerous to life, but they may take a great deal of the joy out of life.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.
